Bugs:

1. Class: **LogState**
   Method: **applyCommand**
   Line: **29**
   Code: **lastSeenType++;**
   Fix: **Moved to helper method to reduce complexity, changes lastSeenType to the last seen type and not just increases it**

2. Class: **InputBarricade**
   Method: **getCommandsFrom()**
   Fix: added String[] check = line.split(" "); . The method will then only check for a command if the len of check is > 1

3. Class: **LogState**
   Method: **applyCommand**
   Fix: **Everytime To is called, increment a count for how many times its been called, if called more than 10 times throw exception**

4. Class: **InputBarricade**
   Method: **apply()**
   Fix:**surround call of apply command with try catch in case the Over Used TO command error gets thrown**

5. Class: **LogState**
   Fix: **refactored part of the big switch statement to a seperate helper method to reduce complexity**

6. Class: **LogState**
   Fix: **refactored part of the big switch statement to a seperate helper method to reduce complexity and set the addr of dest and source based on the last seen type**
